

Biography ***Rodica Mihaela Frincu***

Chemical engineer, with double master degrees in Environmental Science and Environmental Engineering (Austria and Denmark), with wide experience in project management, international cooperation and technology transfer. She has extensive knowledge in circular economy for biowaste streams and side-streams valorisation and, as Director of ICECHIM Technology Transfer Centre, is also involved in scaling up and industrial application of new and innovative products based on bio-based feedstocks. She also has data-base management, web-design, communication and social media skills, as well as experience in assessing industrial partner's needs and intellectual property management.
