

M.Sc. Industrial ecology Milan Veselinov - has been professionally dealing with the circular economy in Serbia since he returned from the Netherlands with the aim of helping responsible companies in the transition to good business, while creating a positive and acceptable environment for such business. The circular economy is his choice as the most logical model to achieve higher profits with the delivery of better products and at the same time save resources, society and the environment. Therefore, it is his professional interest and his expertise.

He had worked on numerous EU projects, likewise on regional and local research and projects. He founded the company CirEkon, which is fully committed and specialized for the transition to a responsible circular economy. He is a member of the World Club of Circular Economy Professionals, the European Group of Experts, the World Organization of Industrial Ecology Professionals, the European Network of Trainers and Coaches Dedicated to Combating Climate Change and is a Peer expert for the INTERREG EUROPE for matters on the topic of circular economy. With the creation of the Academy for Circular Economy, he wants to bring the concept closer to the business world in Serbia and region in the best possible way. He is founder and lead of the expert and innovation Balkan circular economy network called Circular Economy Beacons through which circularity is connecting Greece, Serbia, Romania, Bulgaria, Germany and Spain.

He has obtained a master's degree in Industrial Ecology at the joint program of the Dutch Technical University Delft, the University of Leiden, and the Austrian University Carl Franzens in Graz.

M.Sc. Industrijske ekologije Milan Veselinov - se profesionalno bavi cirkularnom ekonomijom u Srbiji od kad se iz Holandije vratio sa ciljem da odgovornim firmama pomogne u tranziciji ka dobrom poslovanju, i da kreira pozitivan i prihvatljiv ambijent za takvo poslovanje. Cirkularna ekonomija je njegov izbor kao do sada najlogičniji model na koji možemo doći do viših profita uz isporuku boljih proizvoda i pri-tome čuvati resurse, društvo i životnu sredinu. Ujedno, to je njegovo profesionalno interesovanje i njegova ekspertiza.

Radio je na brojnim projektima Evropske Unije, regionalnim i lokalnim istraživanjima i projektima, kako na strateškim, tako i u istraživačkom i poslovnom miljeu. Osnovao je firmu CirEkon koja je u potpunosti posvećena i specijalizovana za tranziciju ka odgovornoj cirkularnoj ekonomiji. Član je svetskog Kluba profesionalaca cirkularne ekonomije, Evropske grupe eksperata, Svetske organizacije profesionalaca u industrijskoj ekologiji, i Evropske mreže trenera i koučeva posvećenih borbi protiv klimatskih promena. Kreacijom Akademije za cirkularnu ekonomiju želi da poslovnom svetu u Srbiji približi koncept na najkvalitetniji način.

Završio je master studije Industrijske ekologije na zajedničkom programu Holandskog Tehničkog Univerziteta Delft, Univerziteta Lajden, Švedskog Tehničkog Univerziteta Chalmers i Austrijskog Univerziteta Karl Franzens u Gracu.
