

Advancing Sustainability of Process Industries through Digital and Circular Water Use Innovations

The AquaSPICEproject

Navigating towards a sustainable, pioneering horizon towards climate neutrality, circular economy and competitiveness in the European process industry for a prosperous and smart society, for water

Aqua Circular Conference October 5 2023.

Andrea Rubini, Director of Operations
Water Europe

The AquaSPICE project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 958396.

AquaSPICE at a glance

AquaSPICE aims at materializing circular water use in European Process Industries, fostering awareness in resource-efficiency and delivering compact solutions for industrial applications.

29 Partners

6 Case Studies

11.055.248€

3.5 years

AquaSPICE Objectives I

The AquaSPICE overall goal is the development and validation of water efficiency management and optimization methodologies, technologies and tools that will carry

process industries forward to a near-zero water footprint target with minimum freshwater consumption and water-borne emissions.

This is pursued through a set of scientific and technical objectives, motivated by real industrial needs analysed through six case studies and a set of impact-related objectives.

Reduce
water
demand

Treat and
recycle
water

Reduce or
recover
water losses

Exploit
alternative
water sources

AquaSPICE Objectives II

Scientific & Technical Objectives

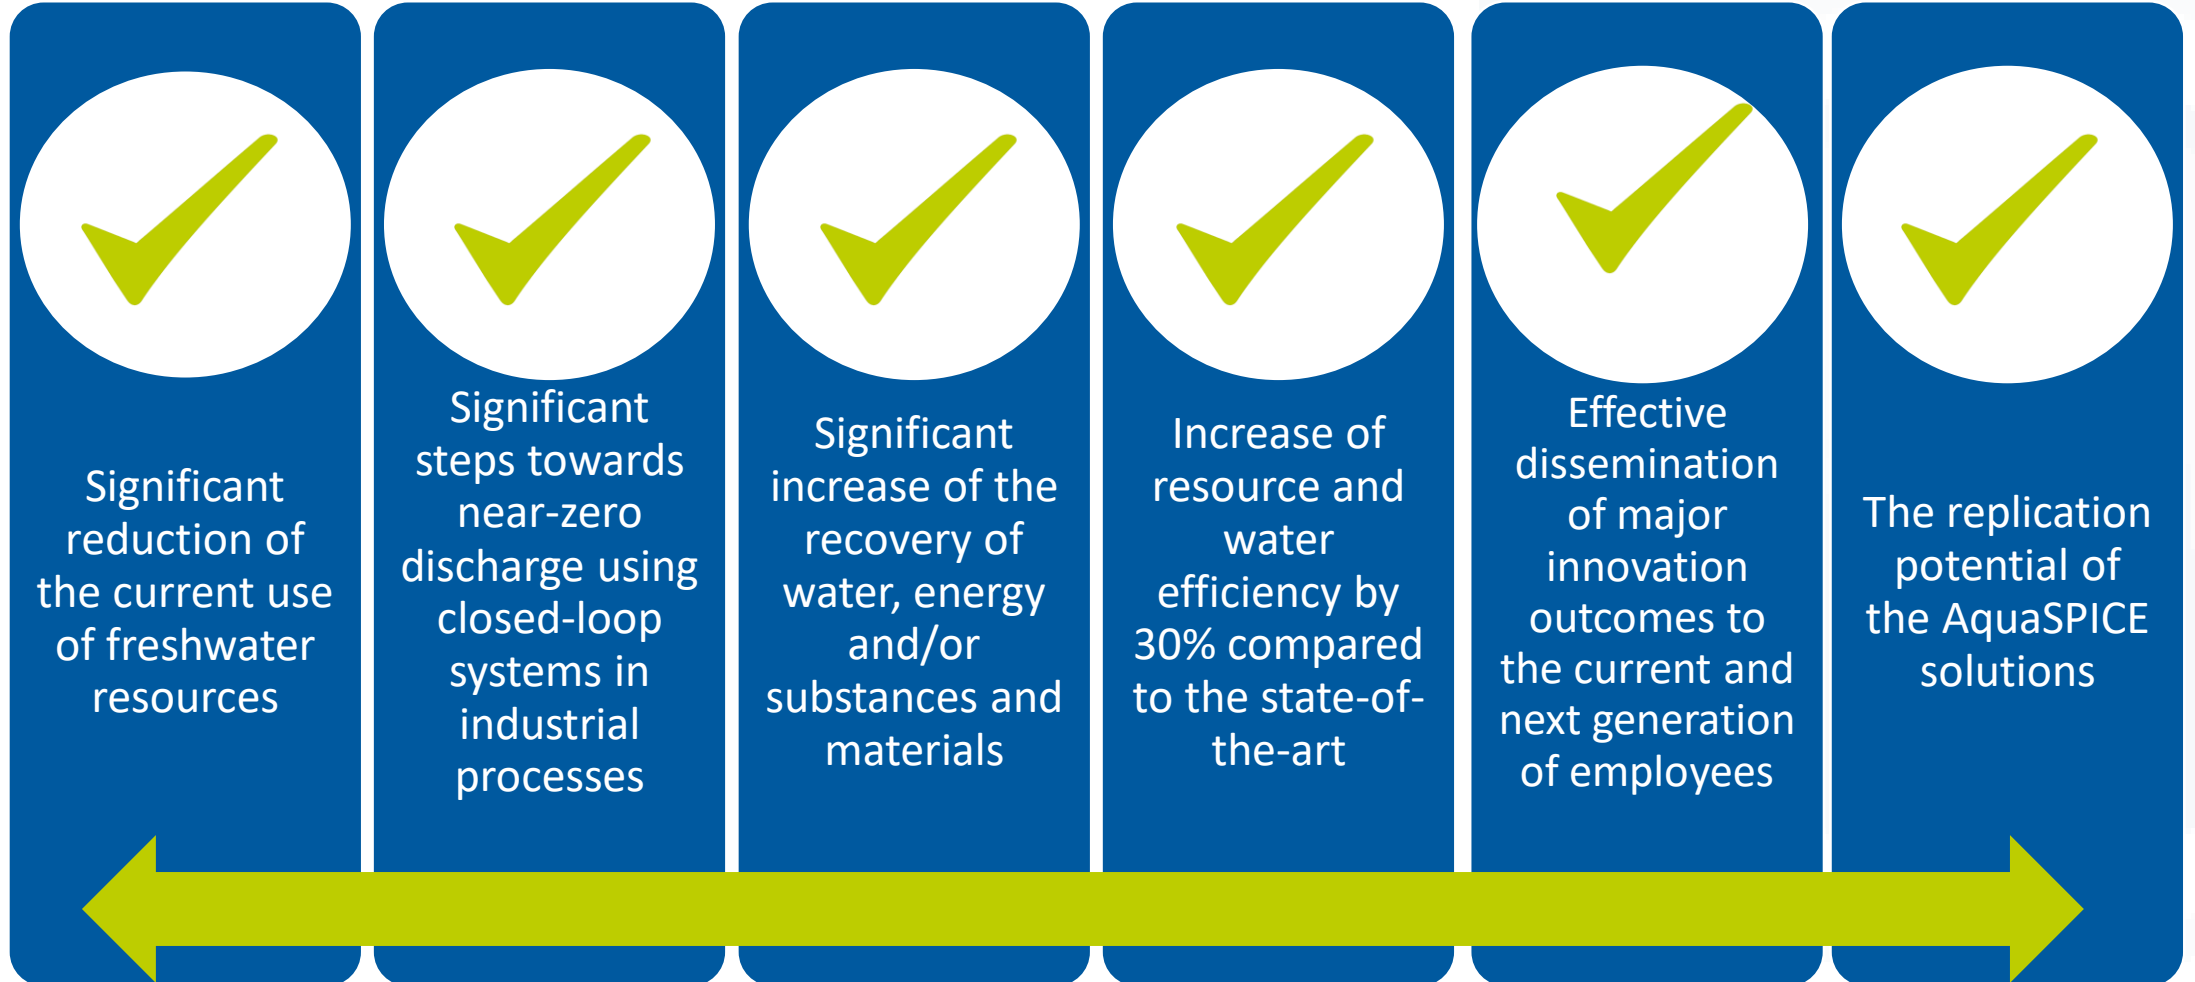

- Deliver a methodological and technical water efficiency enhancement applications framework for the process industry.
- Deliver methodologies and tools as-a-service to support the assessment and optimal application of novel or already established best practices for water recovery and re-use.
- Deliver methodologies and tools as-a-service to support the application of advanced industrial water technologies enabling industrial water recovery/treatment.
- Deliver a monitoring platform, ensuring the continuous and uninterrupted acquisition of reliable, cybersecure and homogenized dynamic data.
- Deliver a virtualisation (digital twin) of water use-recovery-reuse processes and their relations to the production system, its value chain(s) and external connections.

- Deploy, test, demonstrate, evaluate and validate the main AquaSPICE results.
- Plan and facilitate the exploitation of project results.
- Communicate and Disseminate the project's scientific and technical results.

Expected Results and Impacts

AquaSPICE is expected to have an important contribution by bringing the following results and impacts:

DIGITAL INNOVATION

**Towards an Integrated and Digital European
Process Industry
Fostering Optimal Water Use**

Smart
Monitoring

Cyber
Physical
Systems

Cognitive
Manufacturing

CIRCULAR

Water
Symbiosis

Hubs For
Circularity

Cross
Sector
Water
Loops

Alternative
Water
Sources

INNOVATION

Zero Liquid
Discharge

Fit for
Purpose

Water Energy
Nexus

PROCESS INNOVATION

Case Studies

1

Technology focus for freshwater intake reduction at DOW

📍 Boehlen (DE), Terneuzen (NL)

2

Water treatment and re-use within peroxide production units at SOLVAY

📍 Tuscany and Marche (IT)

3

Sustainable and robust water system for the industrial zone of Antwerp at BASF

📍 Port of Antwerp (BE)

5

Sustainable water use in meat production the circular economy at AGRICOLA

📍 Bacau (RO)

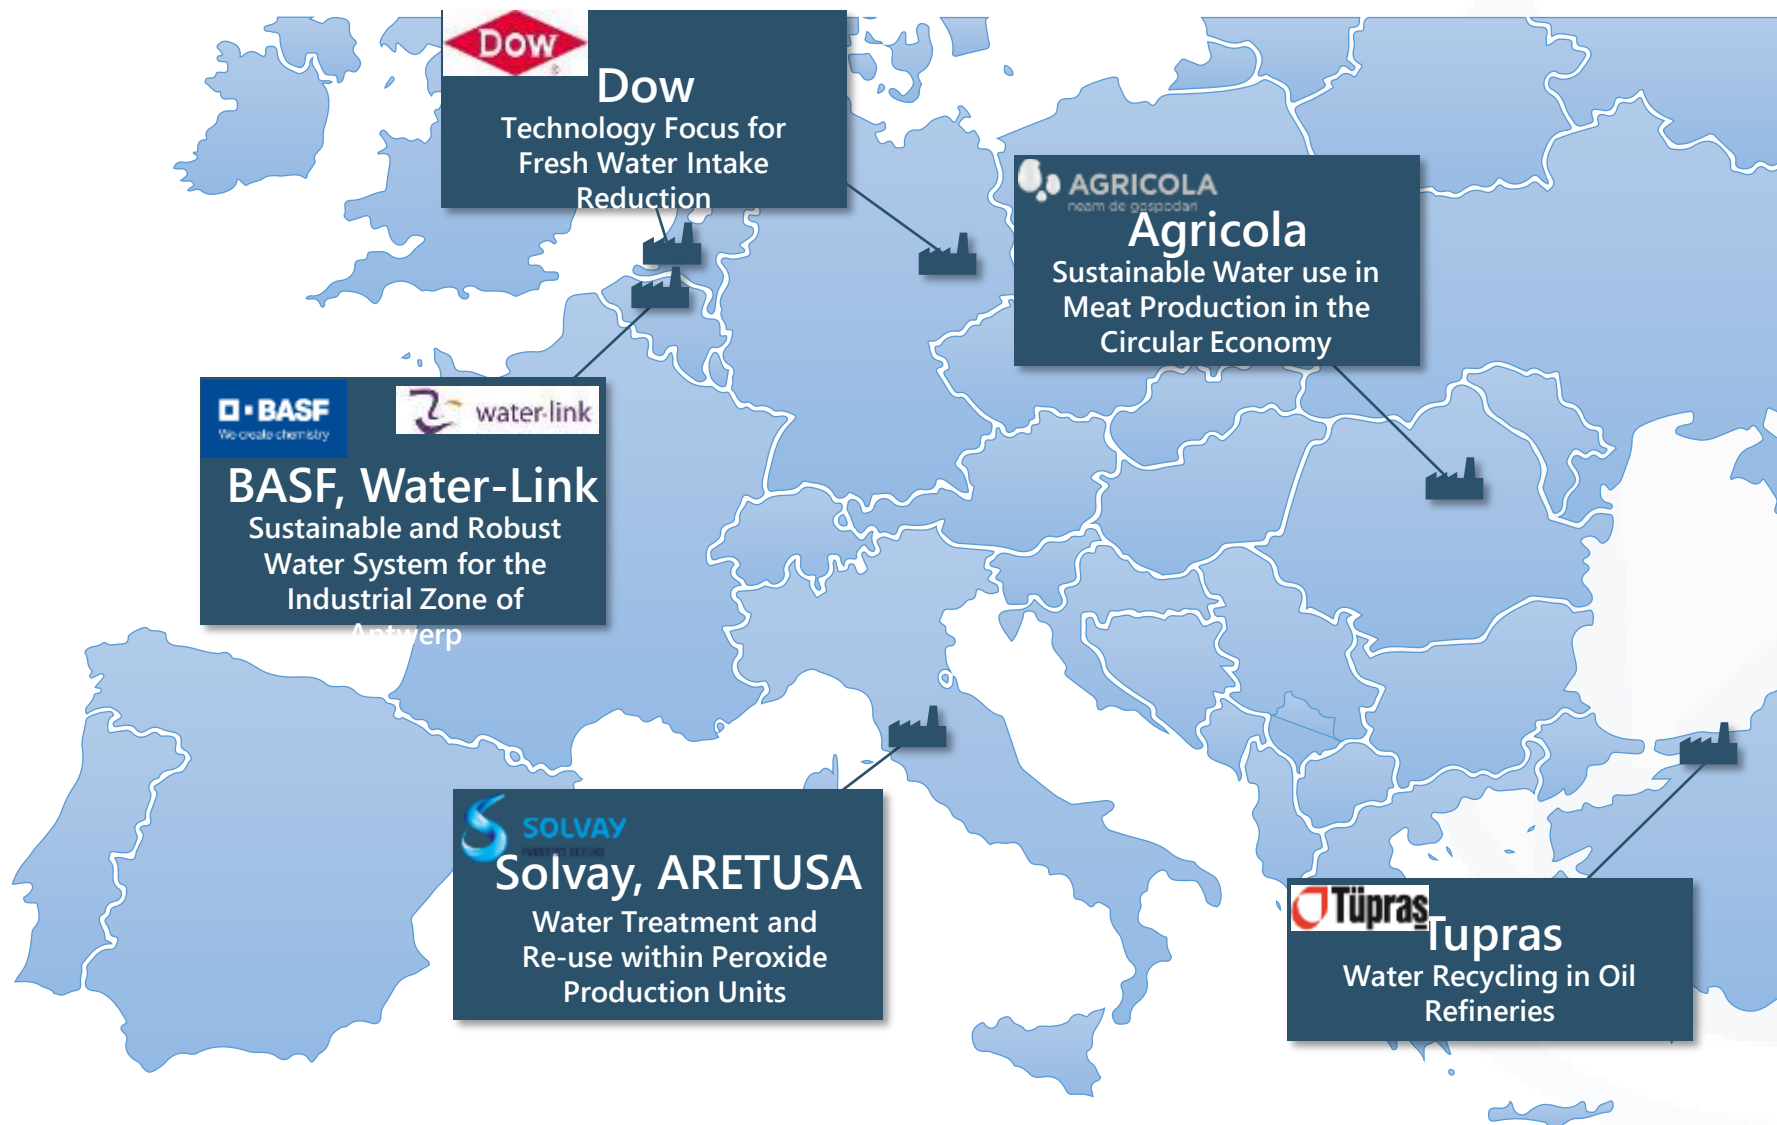

6

Water treatment and re-use within refinery at TUPRAS

📍 Izmit (TU)

Case Studies

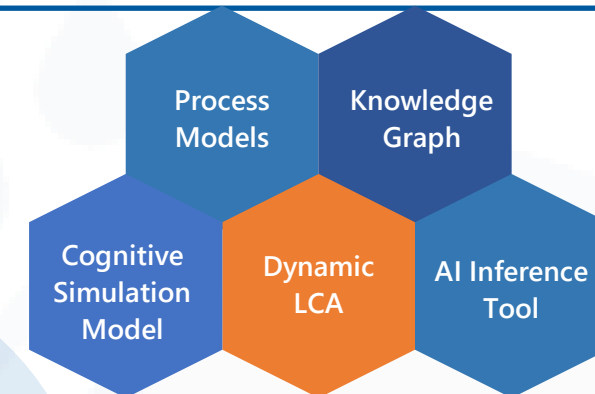

OBJ 1–Water Efficiency Enhancement Framework

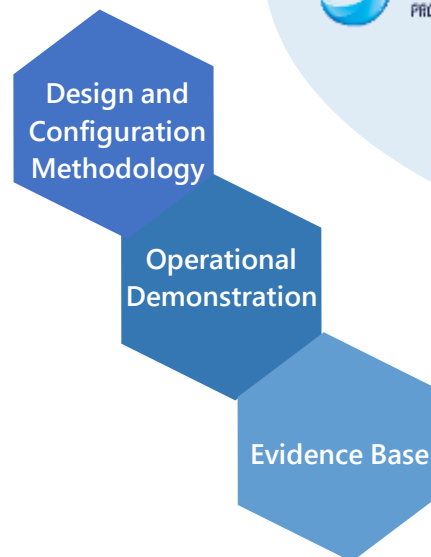

OBJ 2–Optimal Application of Circular Water Re-use Practices

OBJ 5–Virtualization System

OBJ 3–Optimal Application of Water Treatment Technologies

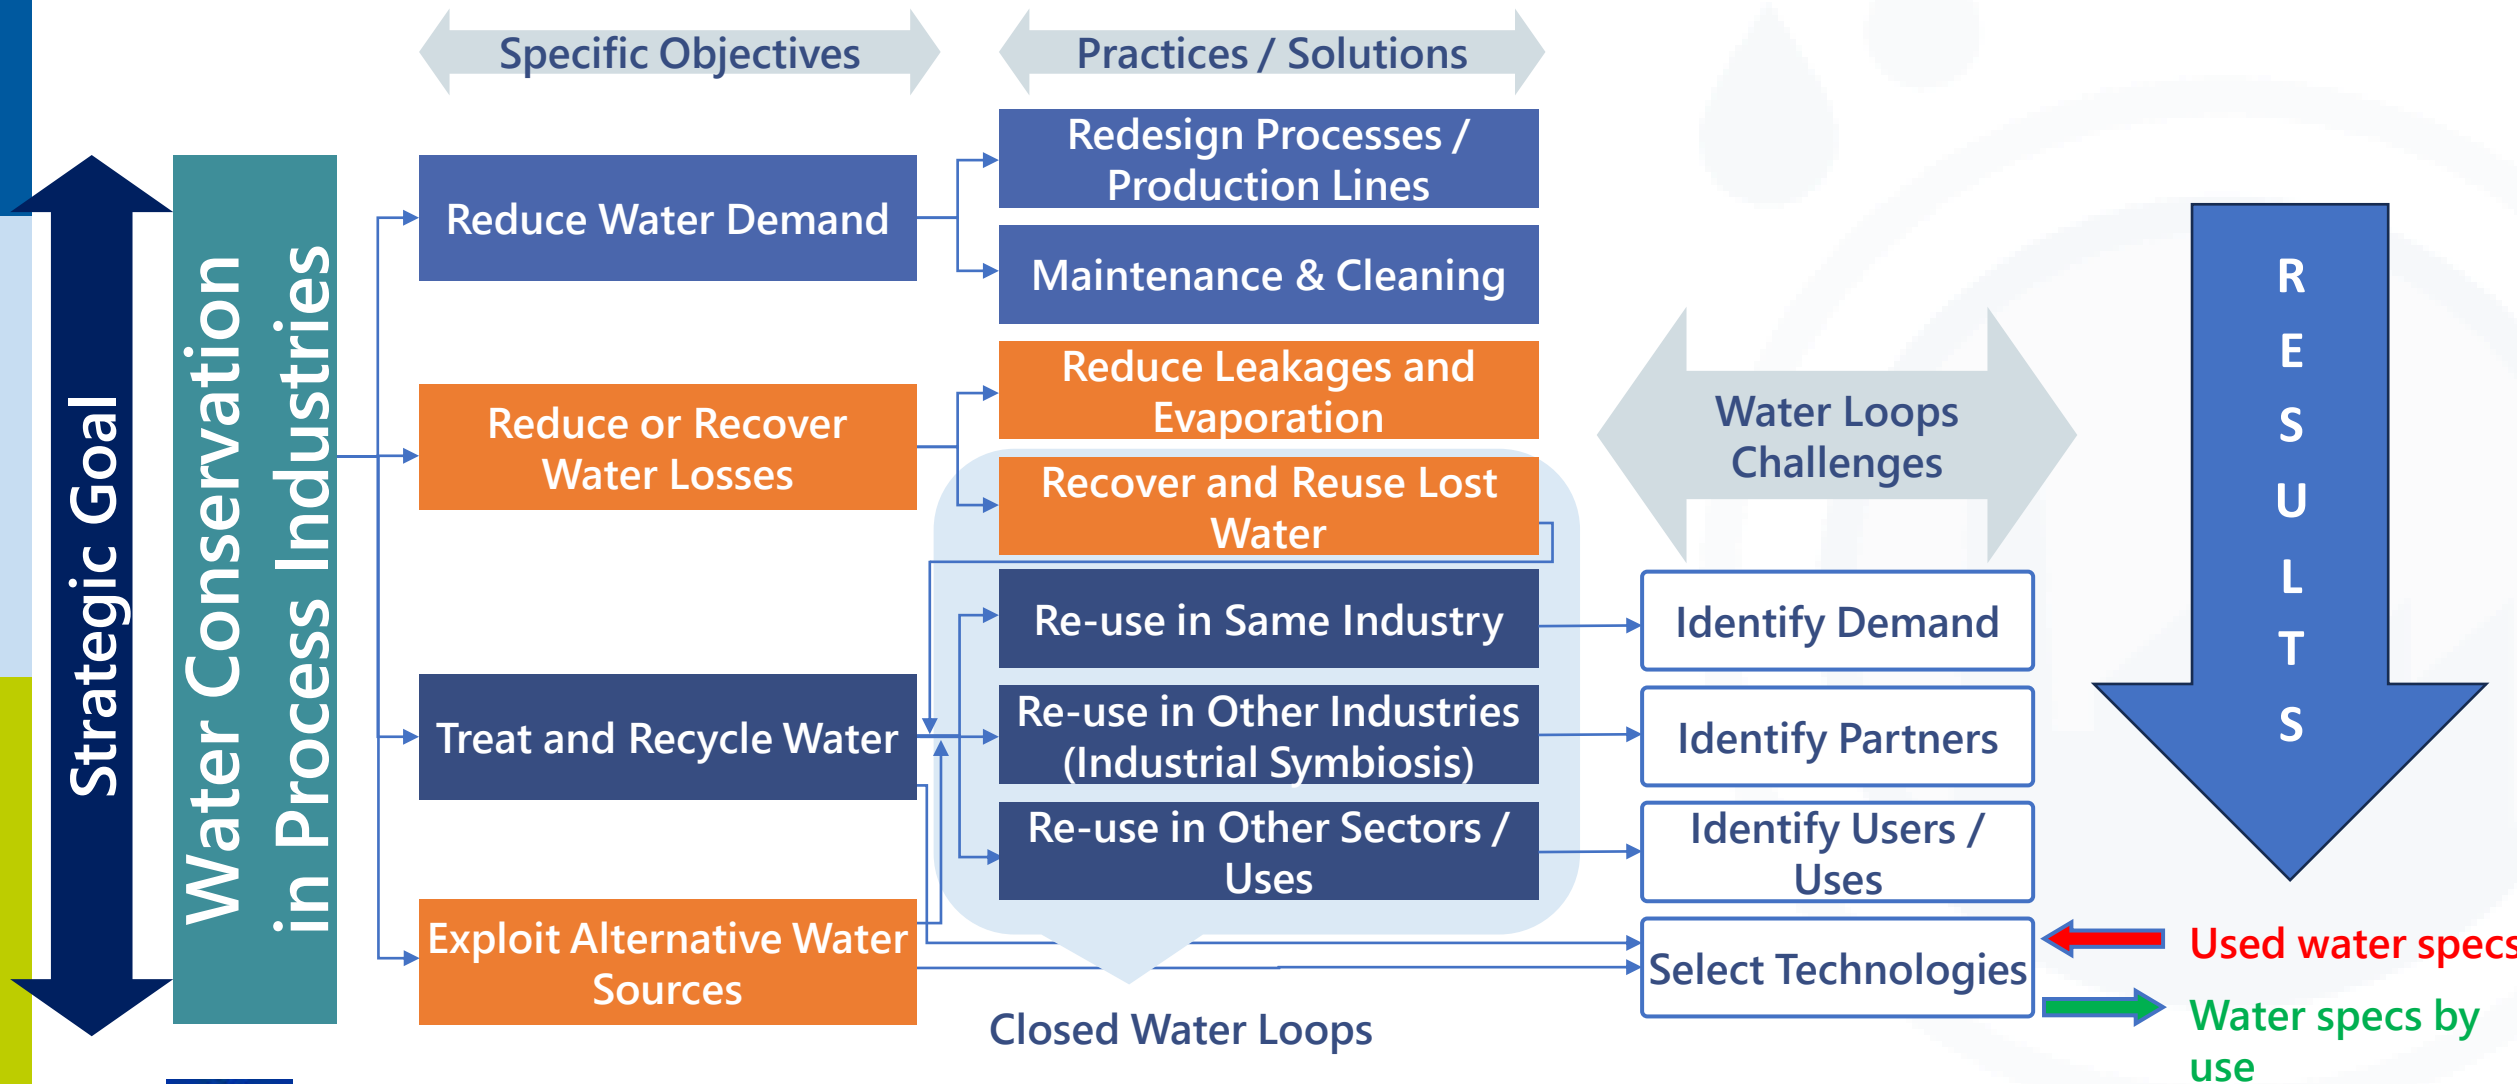

OBJ 4–Water Processes Real-time Monitoring Platform

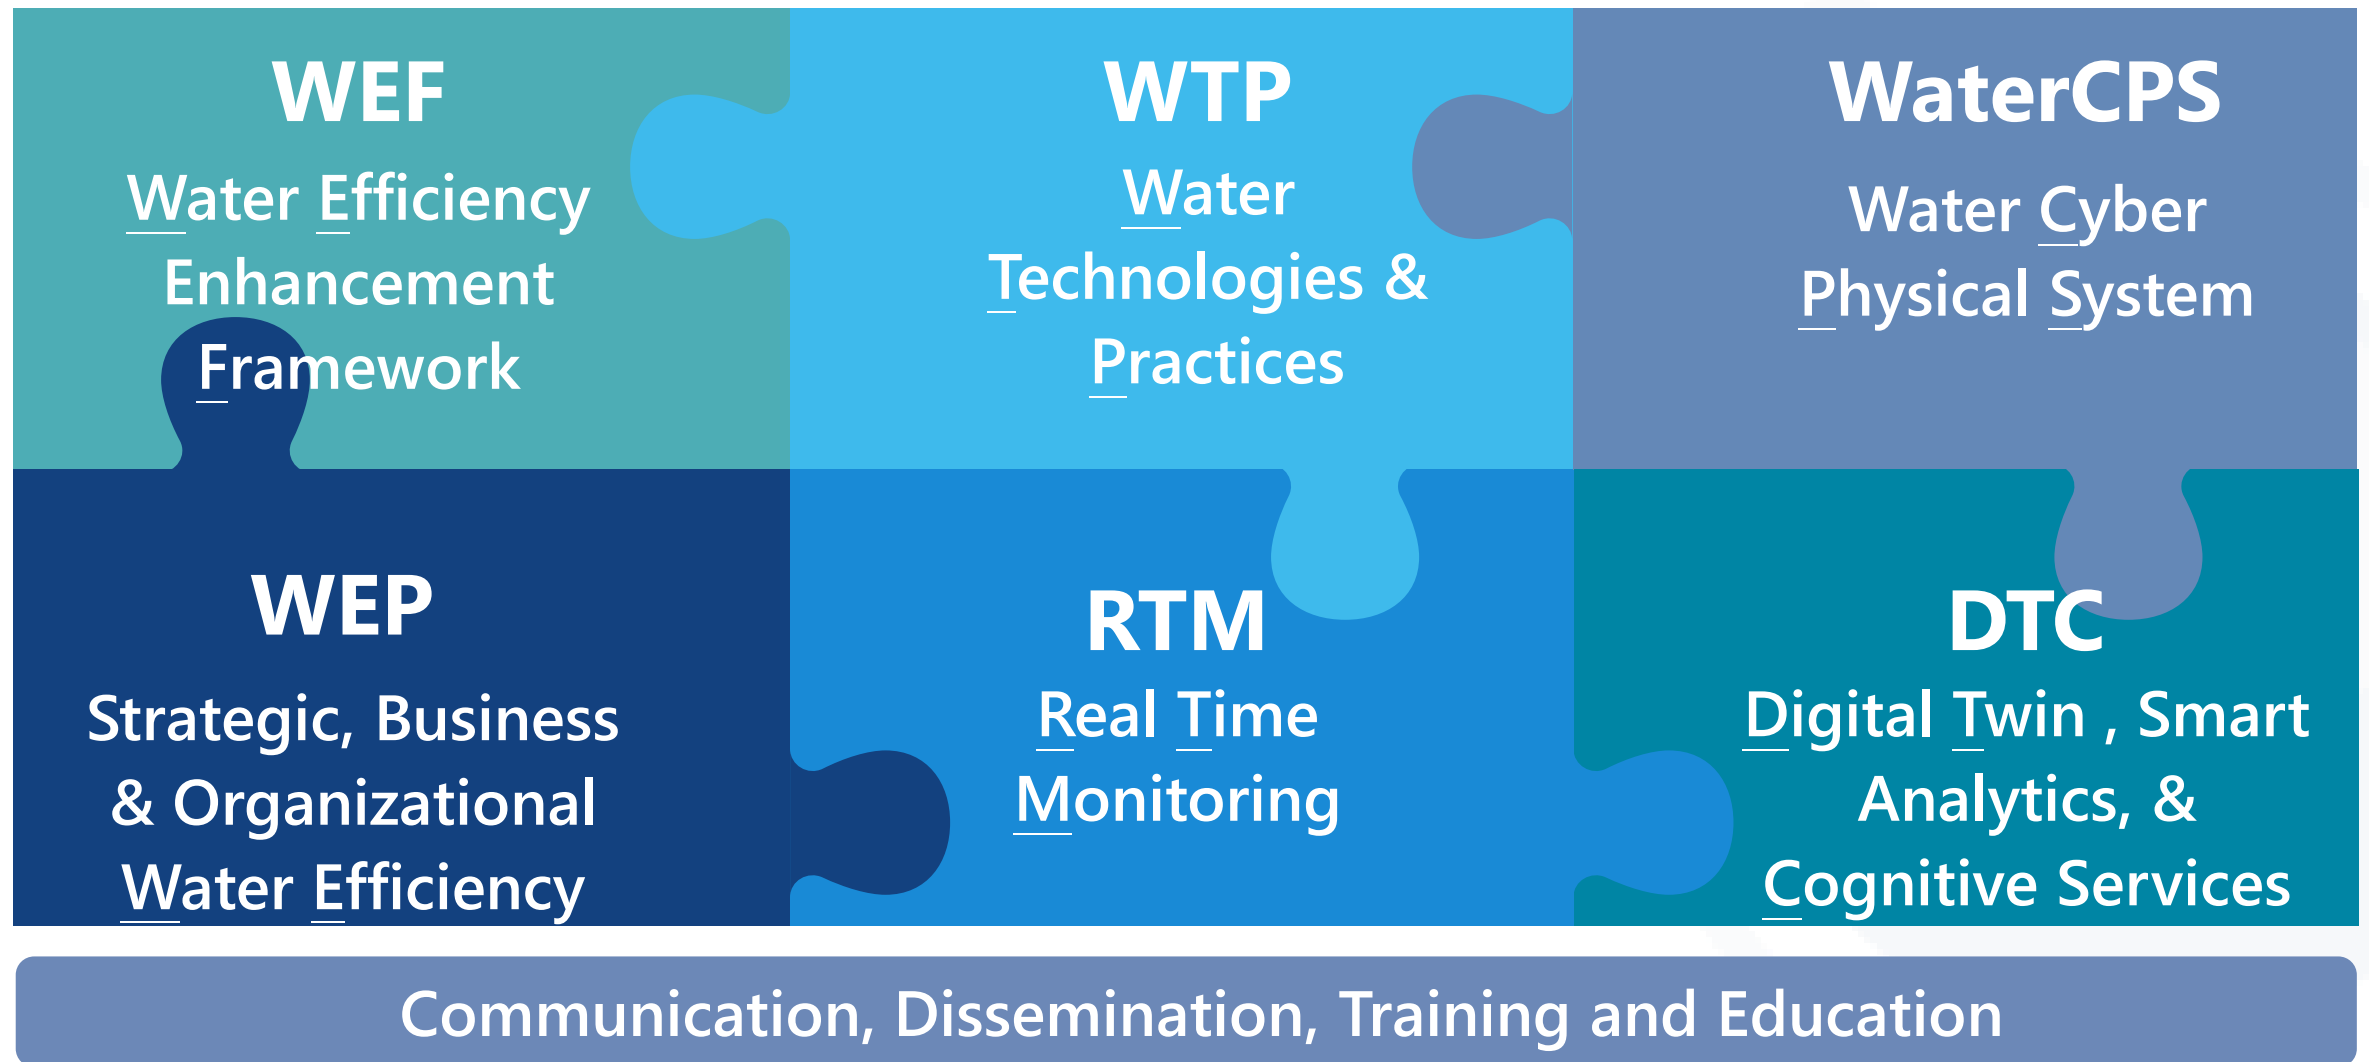

OBJ 6–Water Cyber-Physical System for Water Efficiency Management

The “journey”

THE RATIONALE

GOAL

TARGET GROUP

AWARENESS

SUSTAINABILITY

DIRECT
MODEL

- Engage industrial partners, customers, collaborators
- Understand needs
- Utilize existing networks
- Communication/marketing activities
- Create initial interest and validate delivery models and usage schemes

- Existing customers
- Water and energy intensive industries
- ICT companies (possible integration and new synergies)

- Existing industrial partners communication networks
- AquaSPICE general communication/marketing activities

- **Through AquaSPICE EEIG**
- **Through their existing platforms (integrating AquaSPICE tools)**
- **Existing marketing channels**

CLUSTER
MODEL

- Engage cluster members
- Understand needs
- Utilize existing networks
- Communication/marketing activities
- Create initial interest and validate delivery models and usage schemes

- Cluster members
- Water and energy intensive industries
- Process industry networks (and other networks) that need to improve water management

- Cluster's communication/ marketing channels
- AquaSPICE general communication/marketing activities

- **AquaSPICE deployed at clusters**
- **Marketing activities using the existing procedures**
- **Existing marketing channels**

OPEN
ACCESS
MODEL

- Diffuse AquaSPICE to the research community
- Incorporate knowledge from other SPIRE/H2020 projects into AquaSPICE

- SPIRE PPP
- H2020 clusters
- EU/National research projects

- Collaboration with other SPIRE PPP projects
- Events organised at EU/National level
- AquaSPICE general communication/marketing activities

- **Participation in relevant committees**
- **Close synergy with policy makers**

Project Duration

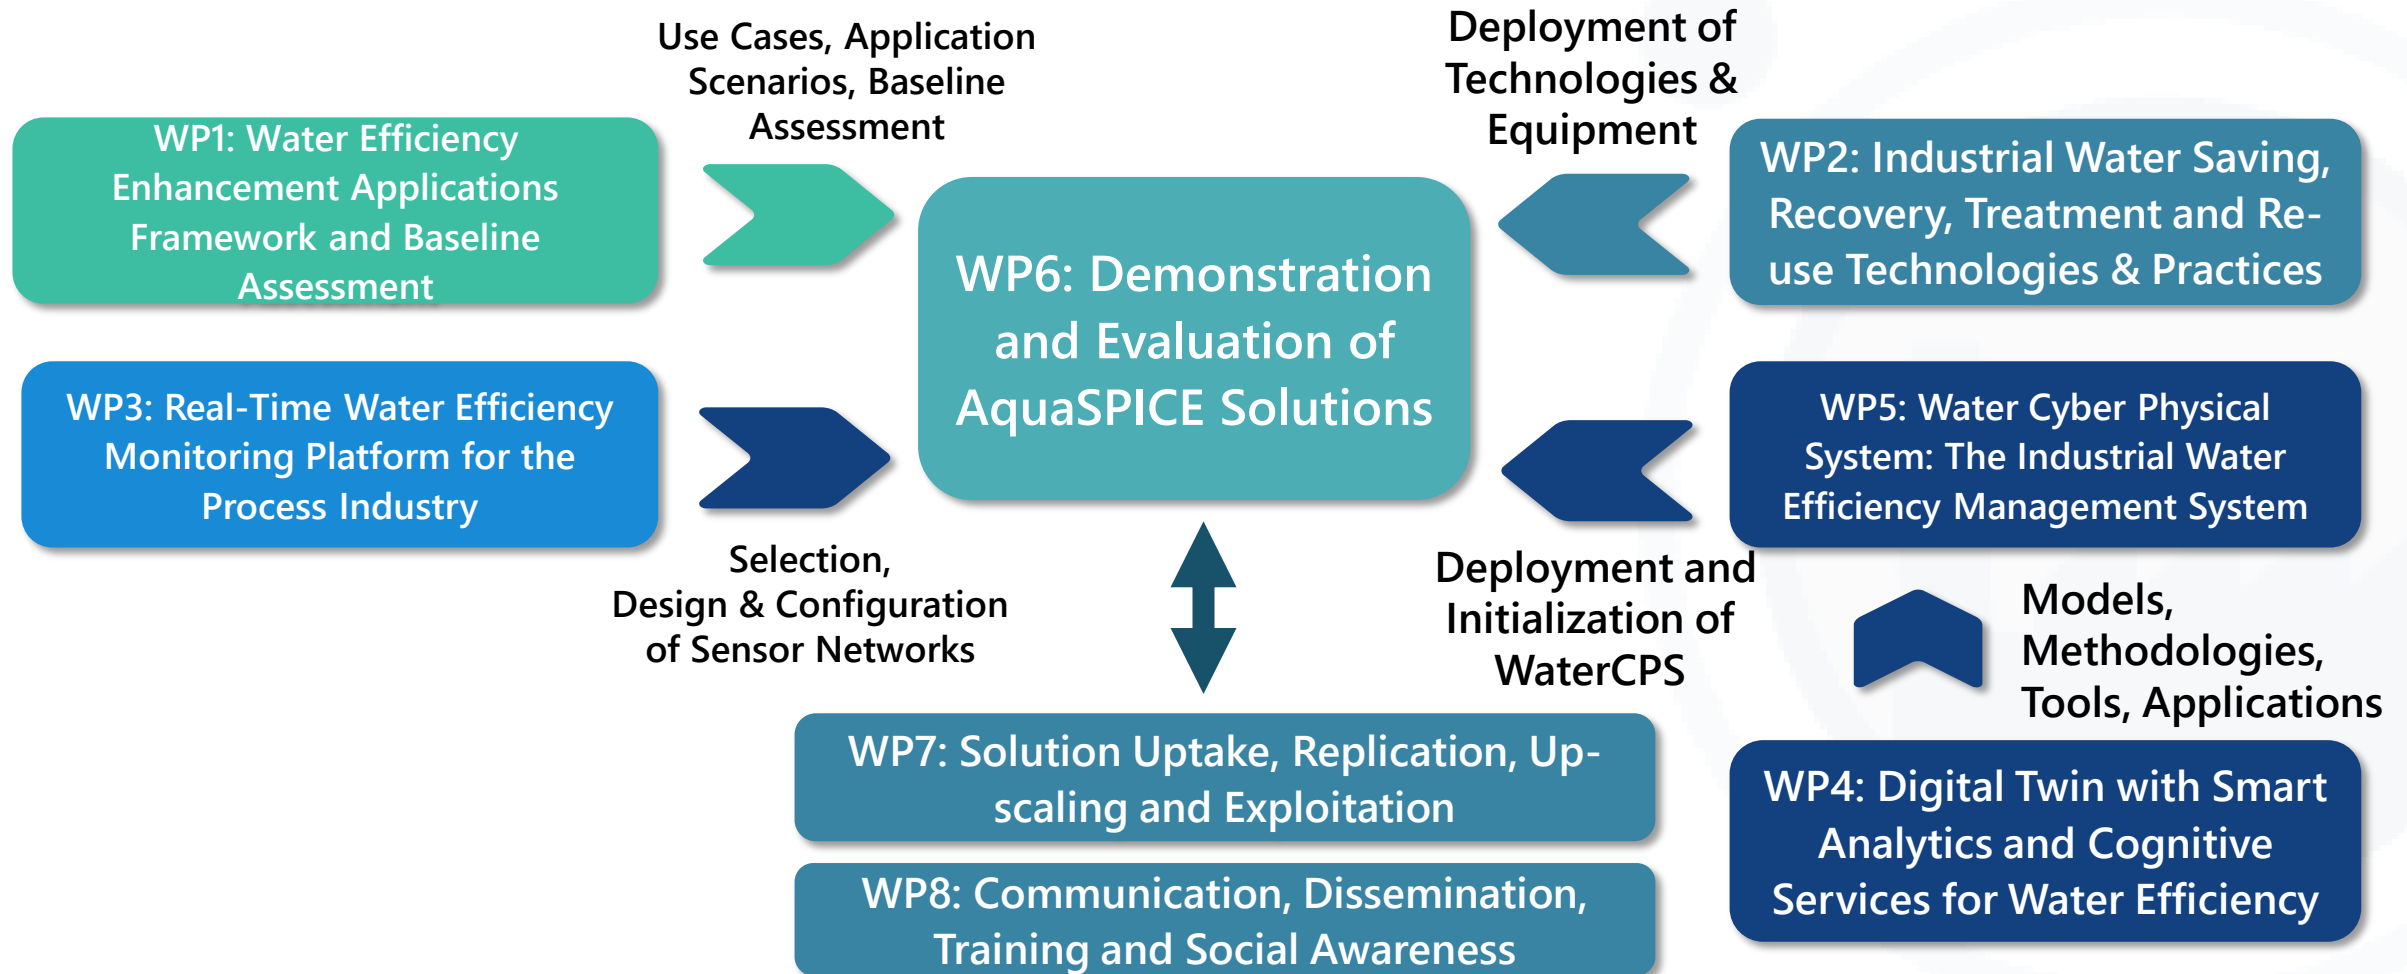

After the Project End

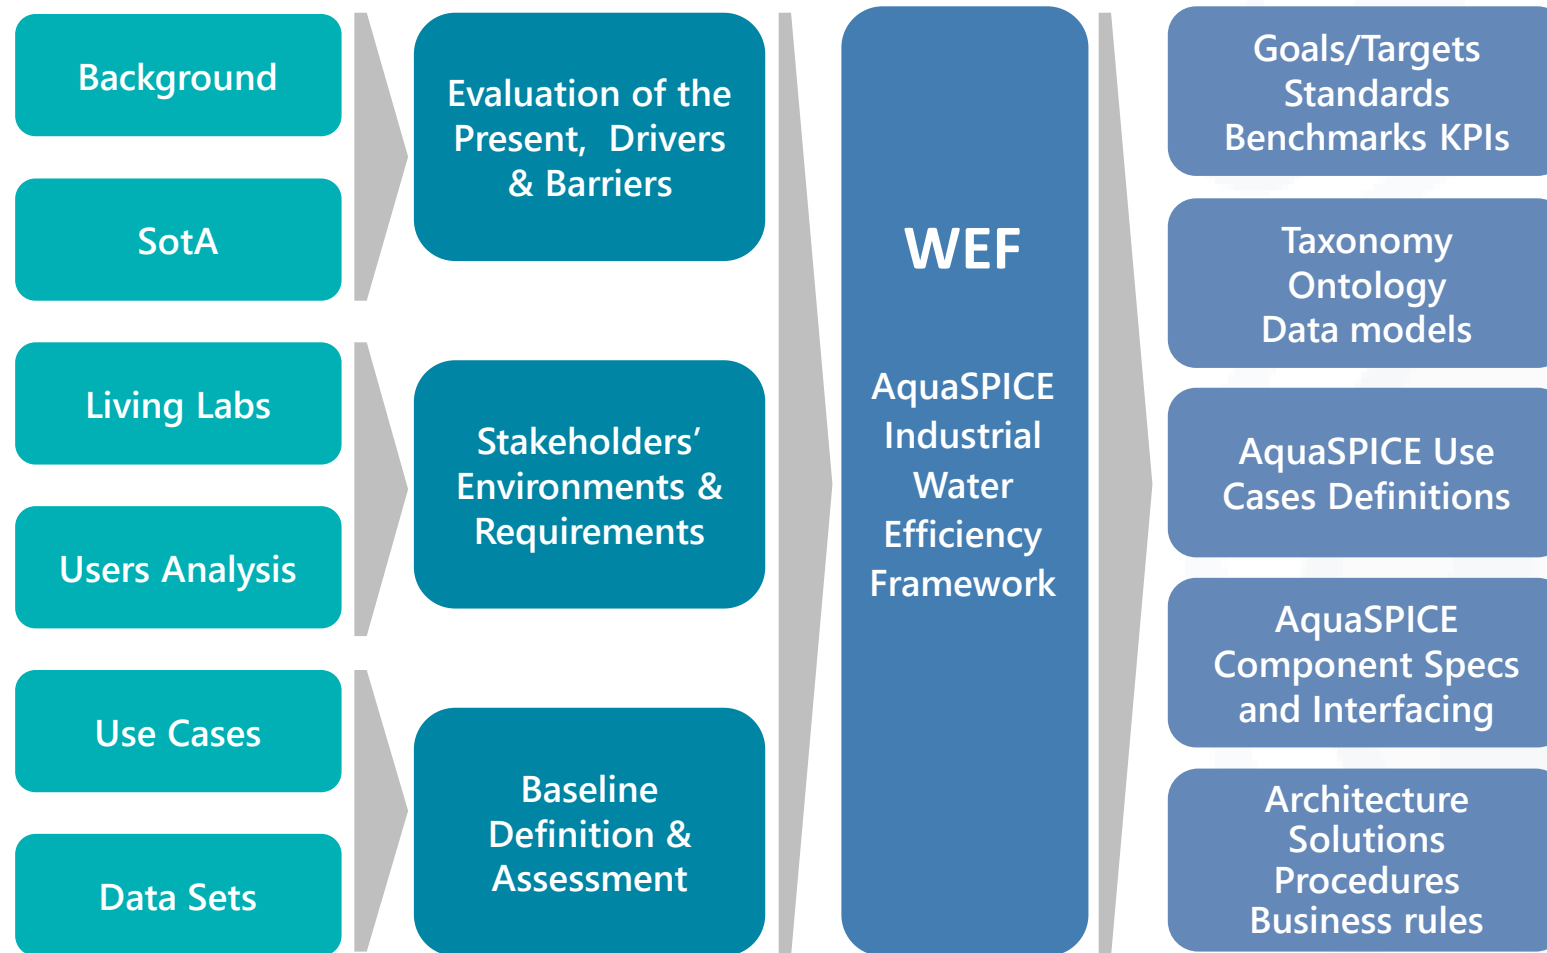

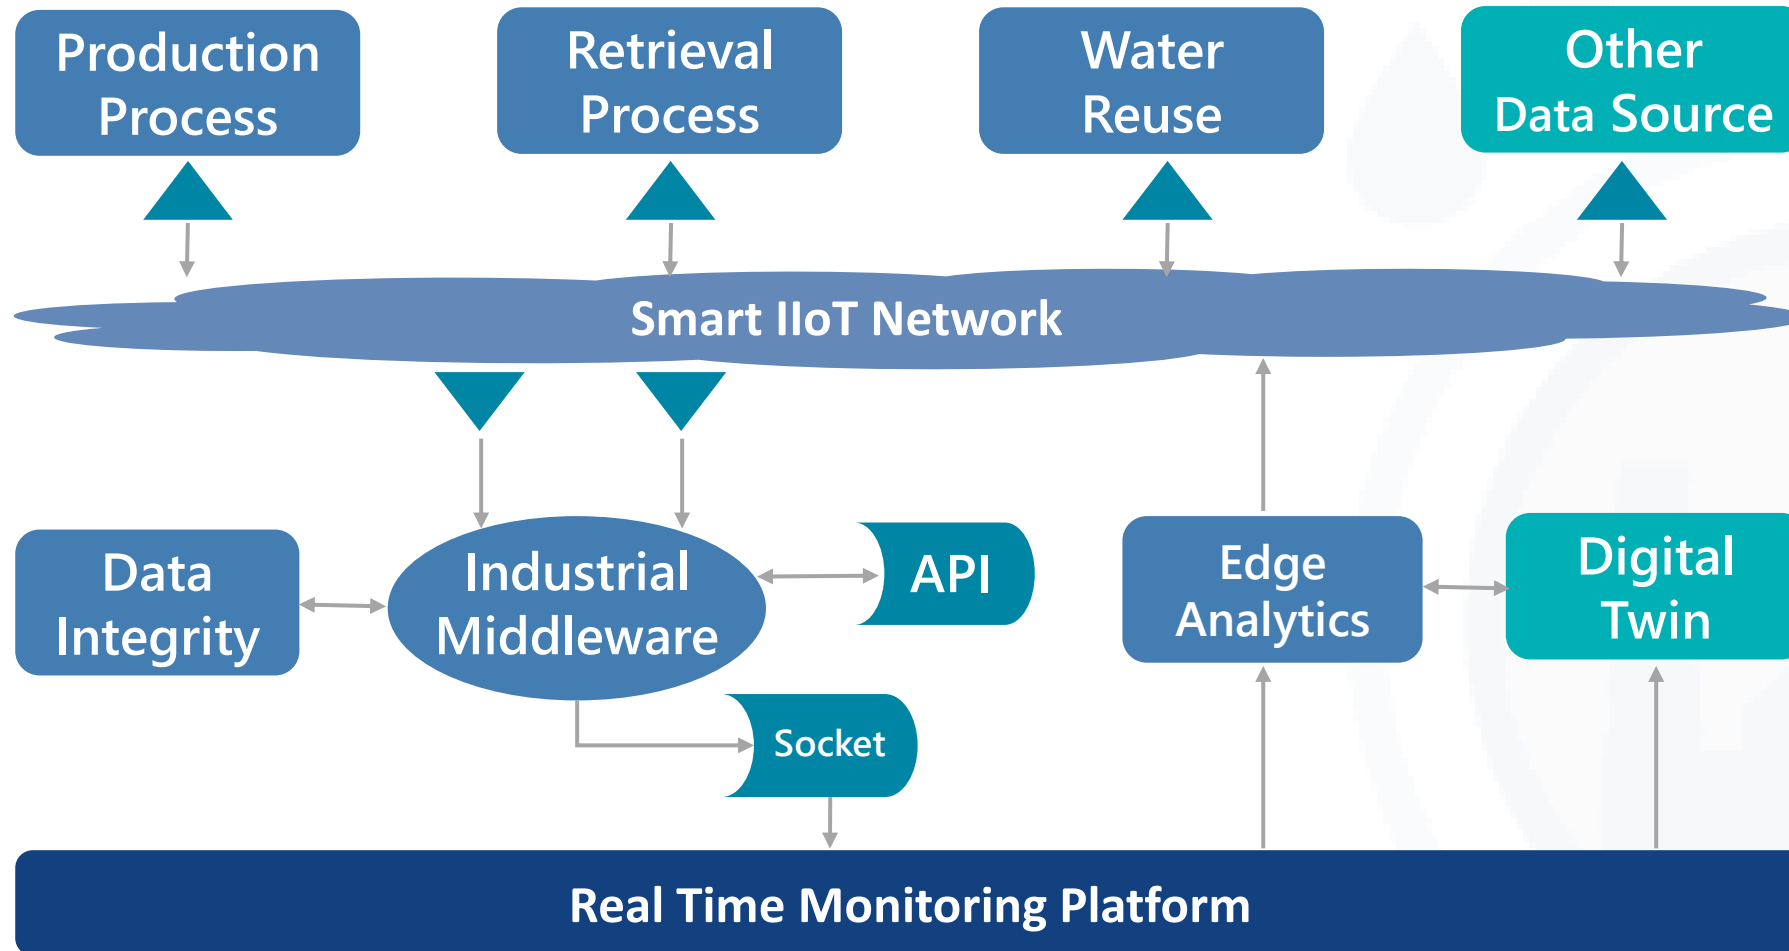

The AquaSPICE project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 958396.

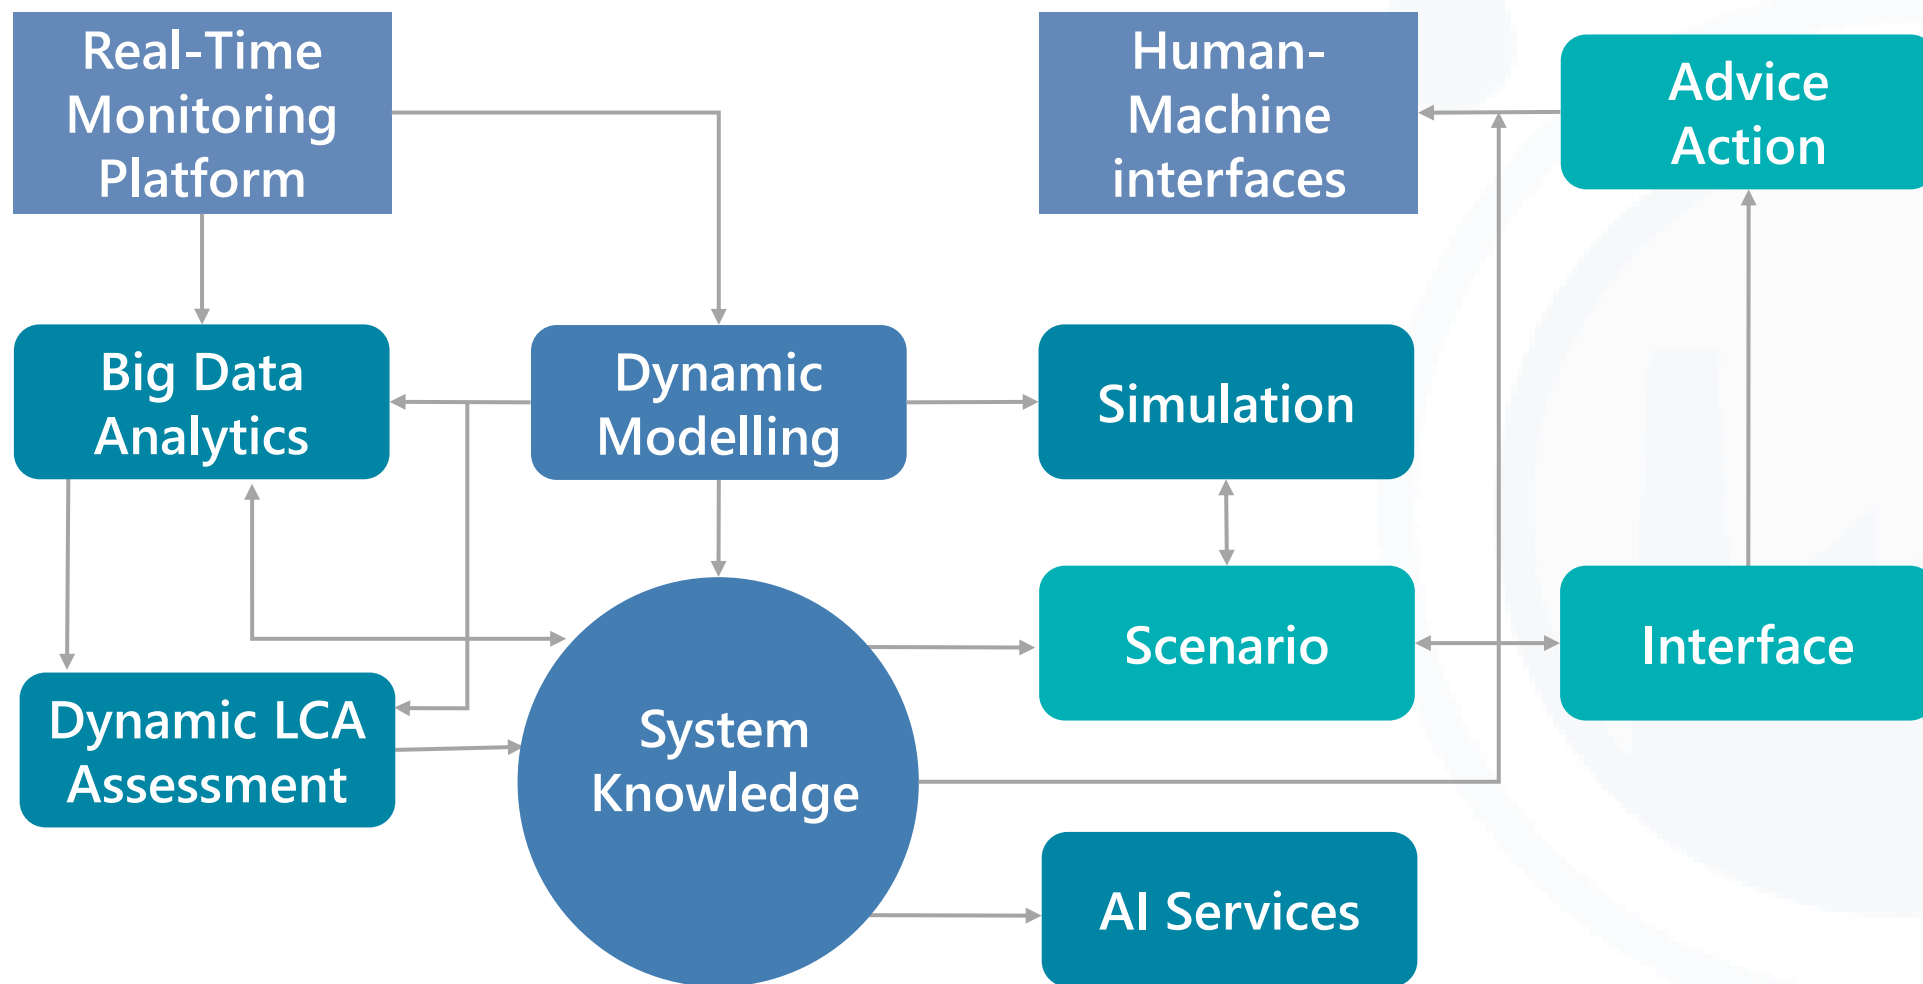

The Work Packages

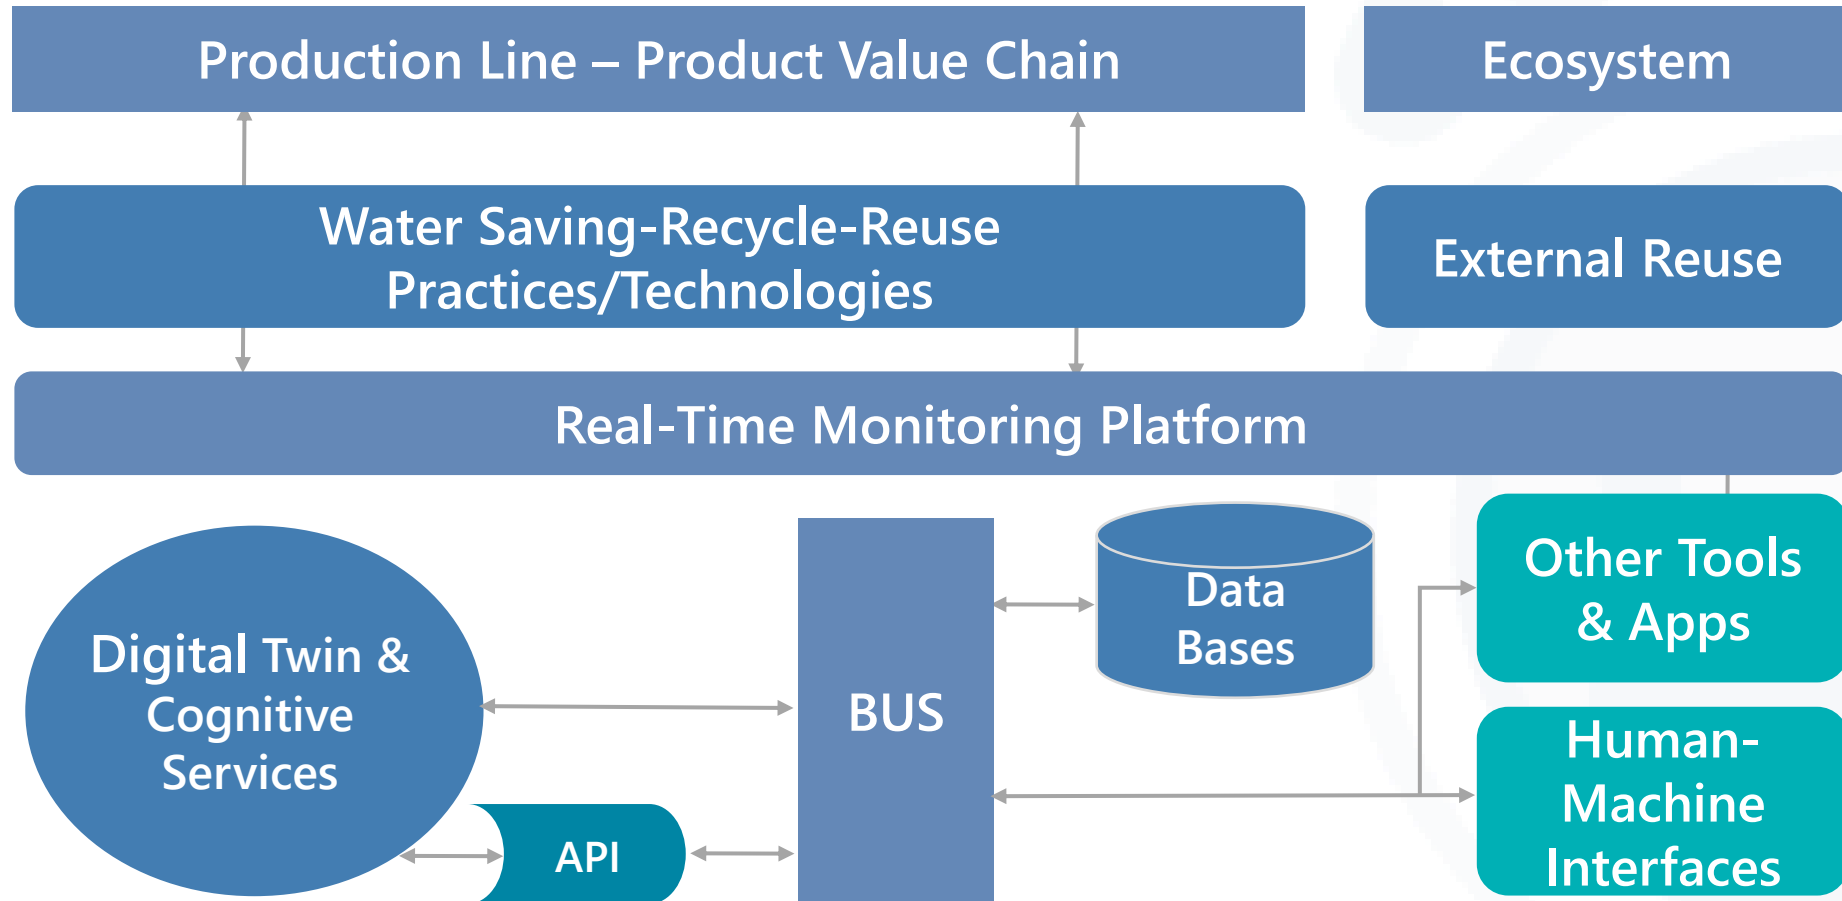

WP9: Project Management, Quality Assurance and Reporting

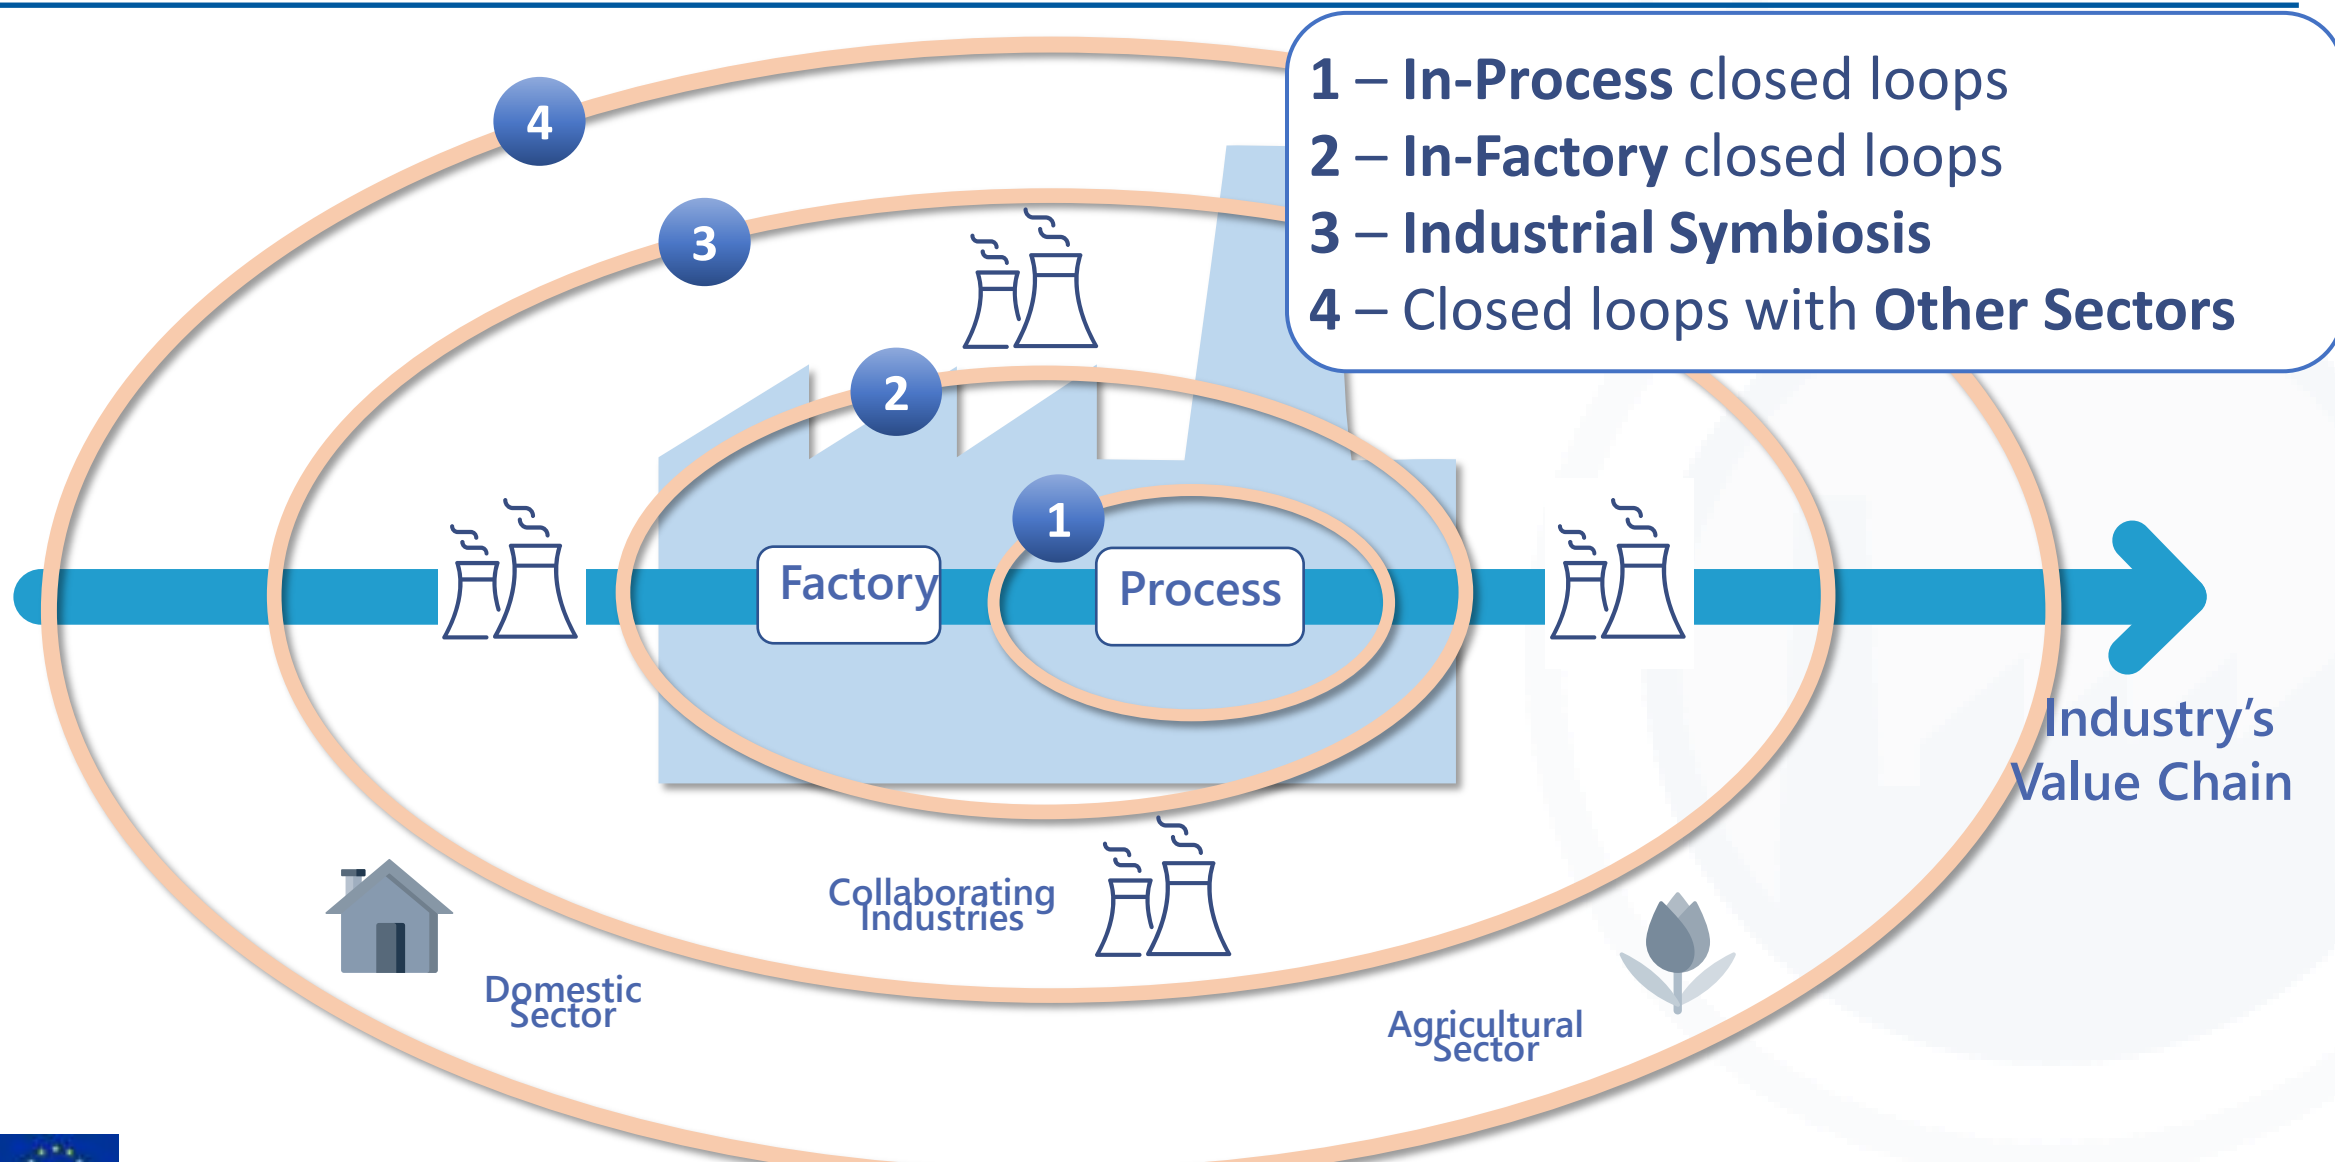

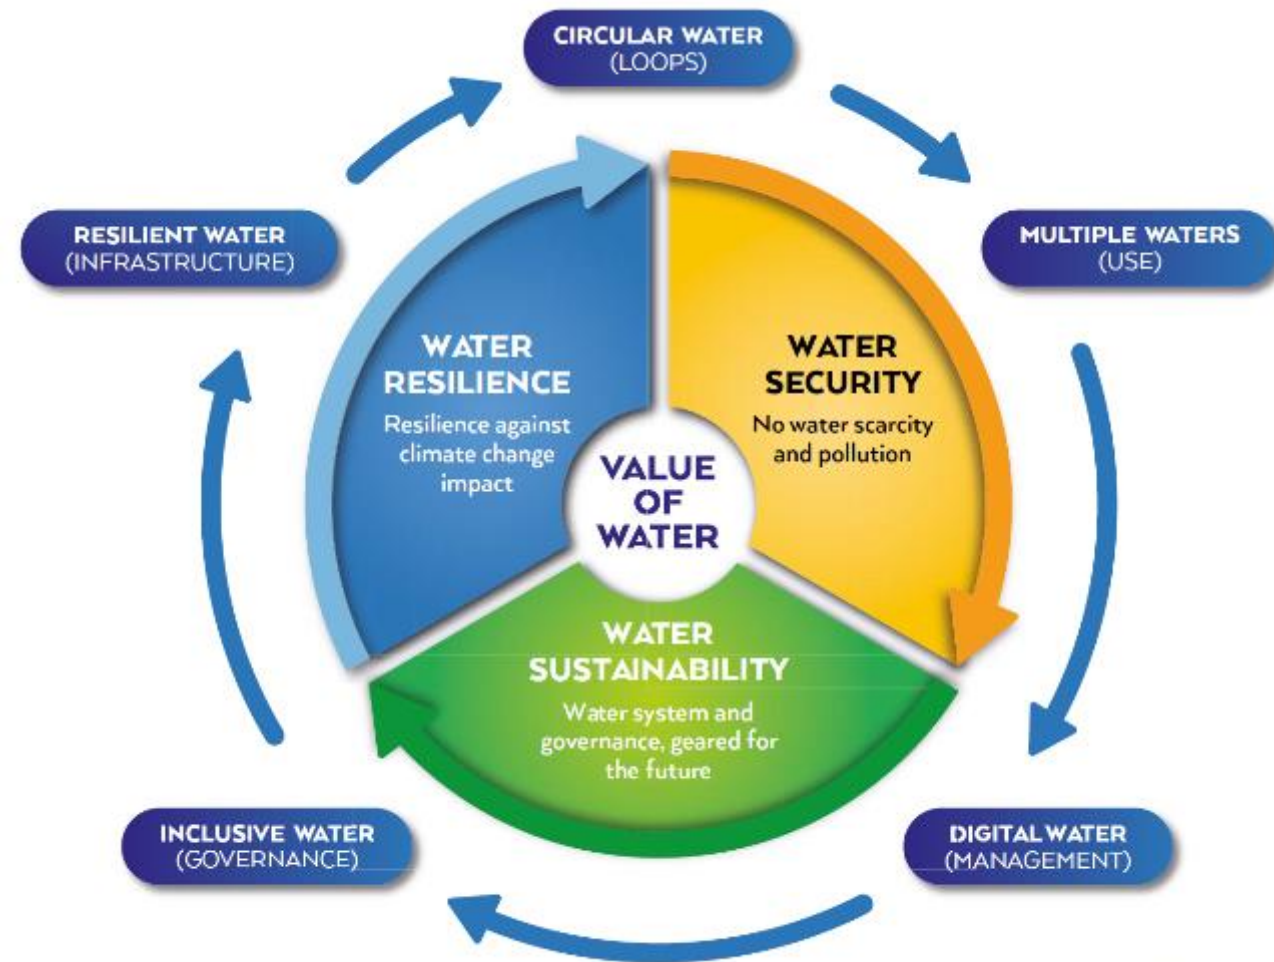

What is the way forward?

Water-Smart Society:

- A society in which the **value of water** is recognised and realised to ensure water security, sustainability, and resilience.
- all available water sources are managed so that **water scarcity and pollution** are avoided.
- water and resource loops are largely closed to foster a **circular economy and optimal resource efficiency**.
- the water system is resilient against the **impact of climate and demographic change**.
- all relevant stakeholders are engaged in guaranteeing sustainable **water governance**.
